

Machined parts

When it comes to engineering a product, there is a permanent glancing toward manufacturing limitations and cost-effectiveness.

During the years, we have developed an unparalleled capability to accomplish our customer requests with extreme and flexible solutions.

Our manufacturing capability consists almost any production technique in the Fluoroplastics industry, such as:

- Welding
- Poly-fusion
- Injection molding
- Transfer molding
- Isostatic molding
- Compression molding
- Extrusion
- Rotolining
- Coatings
- Metal-fabrication
- Machining
- C.N.C
- CAD-CAM

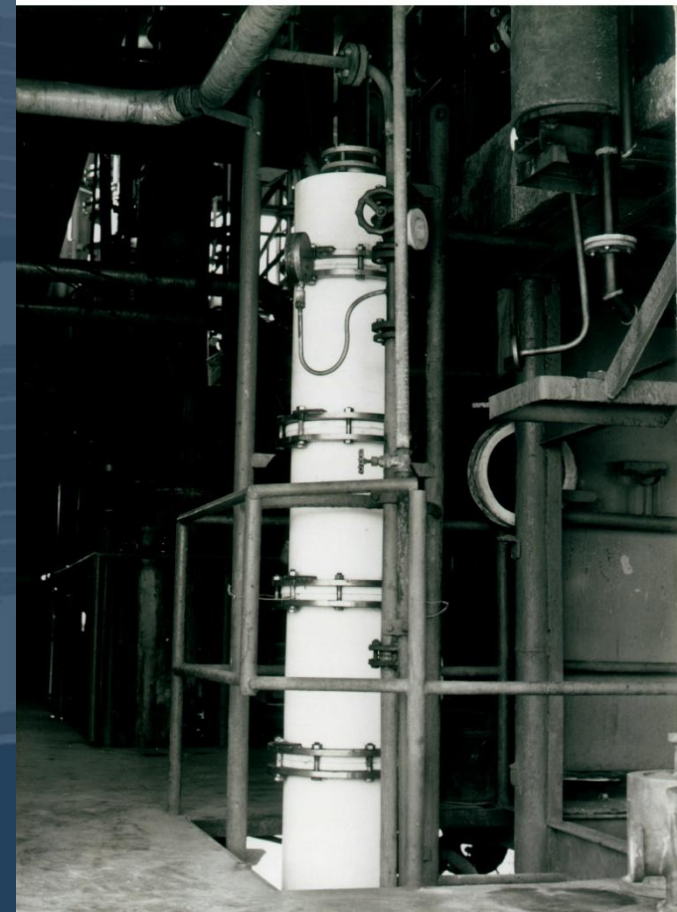

Suppliers

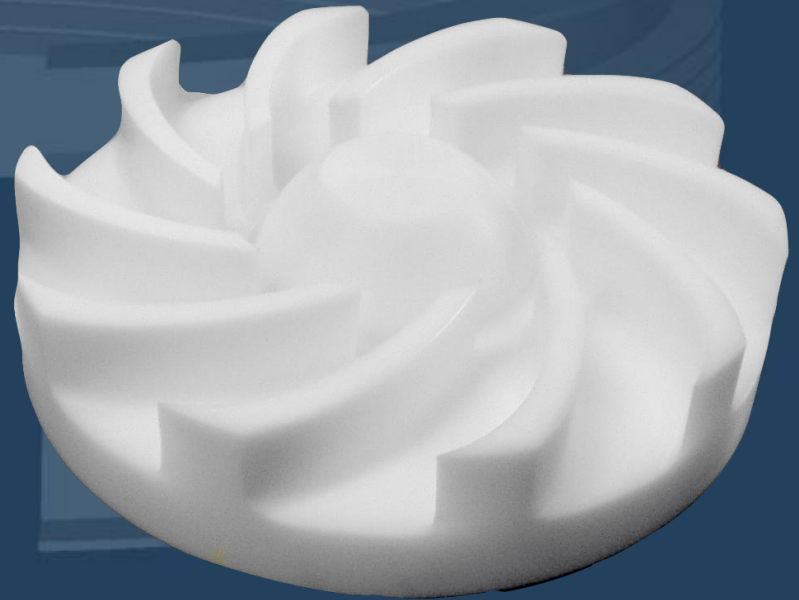

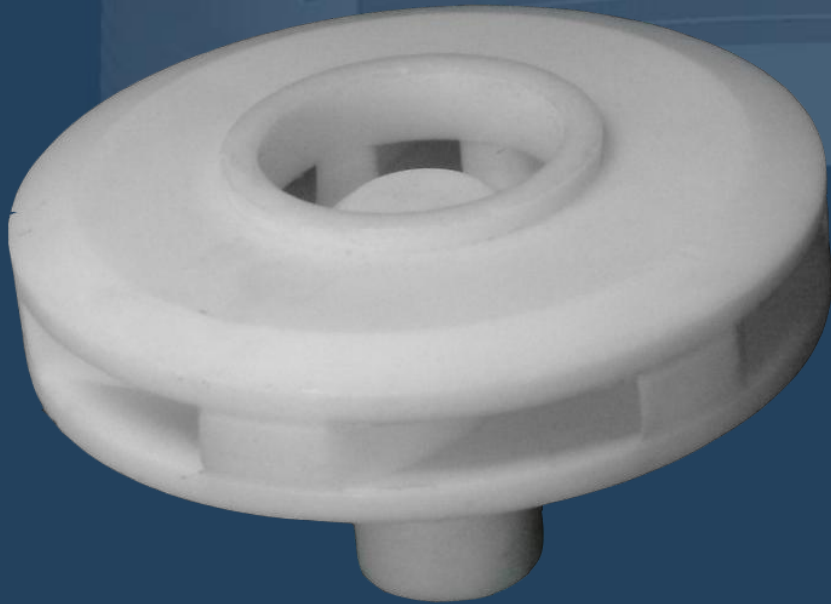

MB Plastics Europe BV

PTFE/TFM solid reactors and vessels

Costume- made impellers for magnetic and mechanical pumps applications.

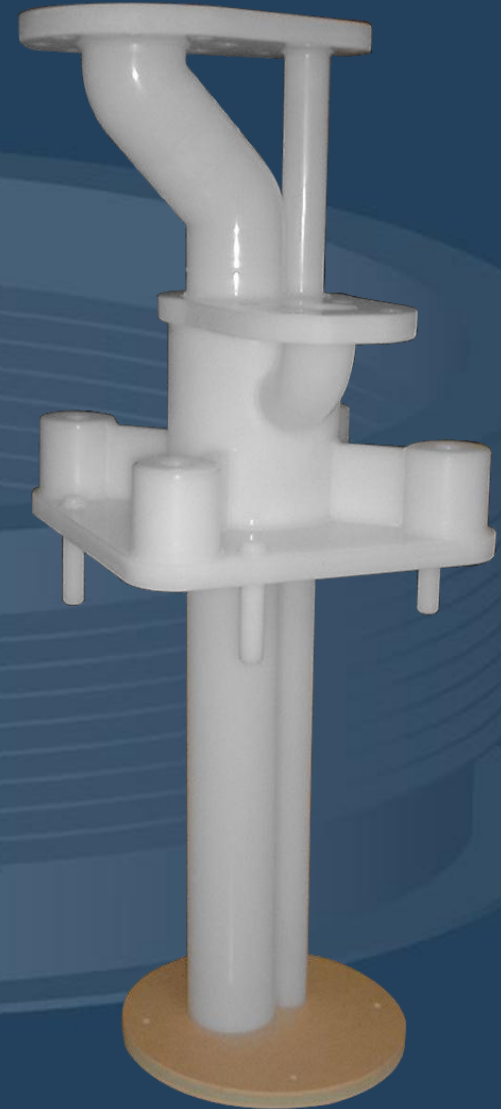

Steam-ejectors made from PTFE/TFM with any attachment required

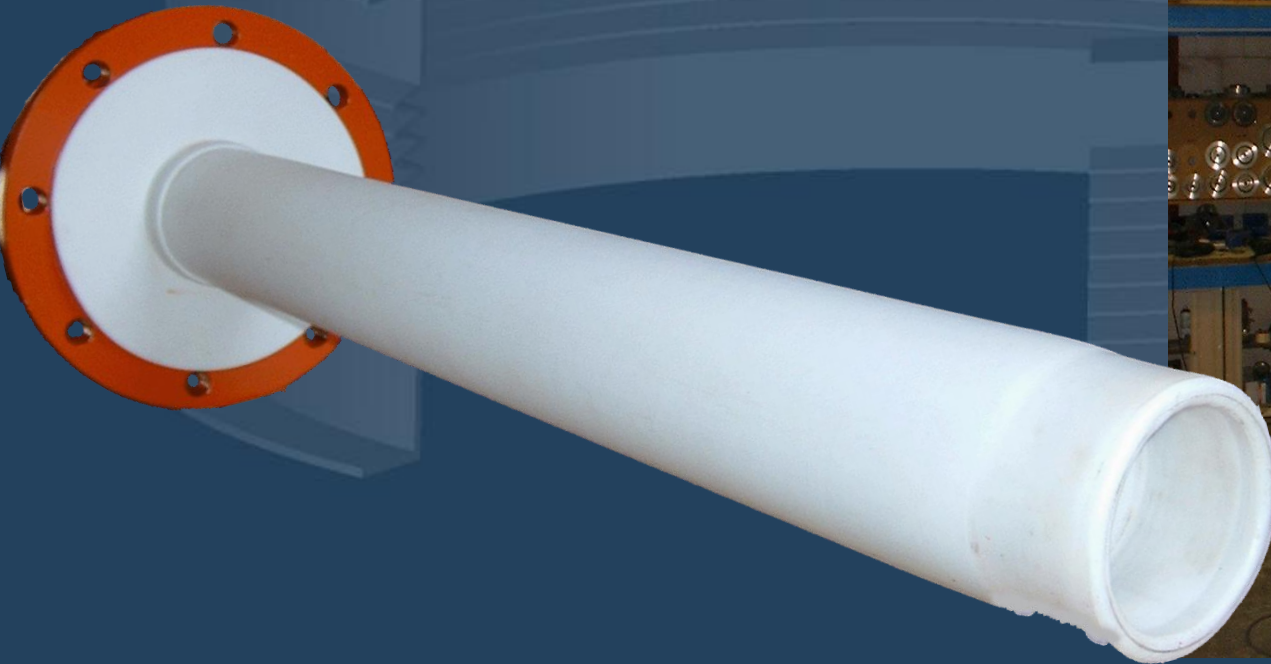

PH-meters

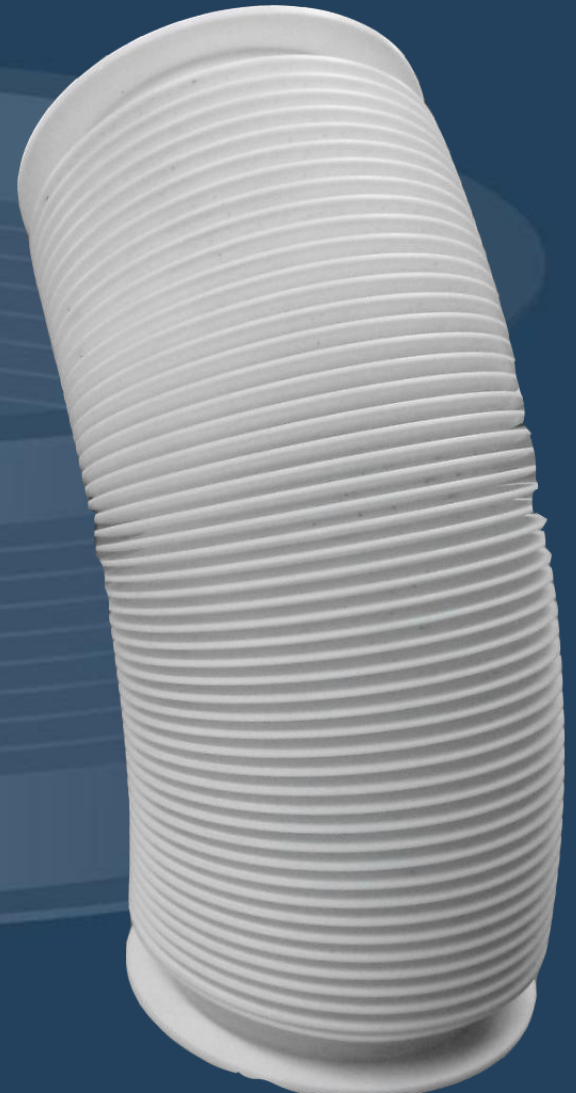

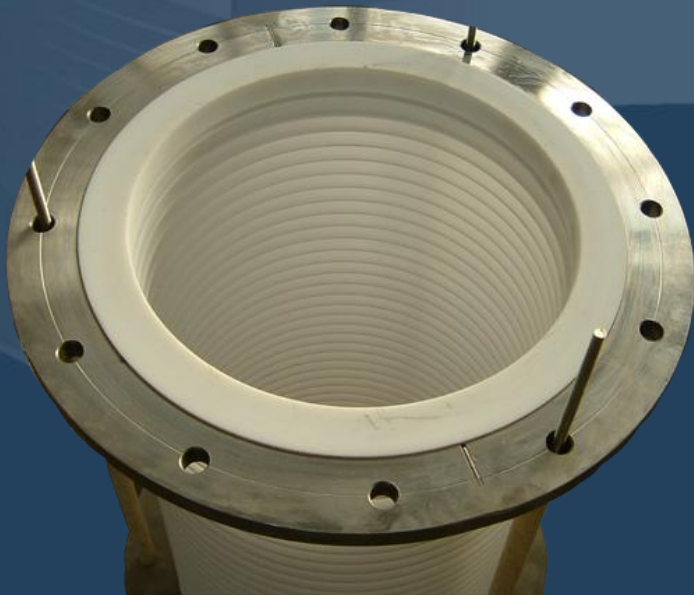

Costume -welding

Dip-pipes

Costume made bellows

Machining
