

#SURELINE

Datasheet - Fluoropolymer Lined Dip Pipe

The Dip pipes are manufactured from a carbon steel or stainless steel fabricated construction with a continuously lined paste extrusion Fluoropolymer liner. One piece of the Fluoropolymer liner lines and protects both inner and outer diameters of the dip pipe. Our advance manufacturing techniques enable us to produce dip pipes without any welded end. This eliminate a potential weak point completely.

Specifiactions

Norm:

- ANSI
- DIN

Material:

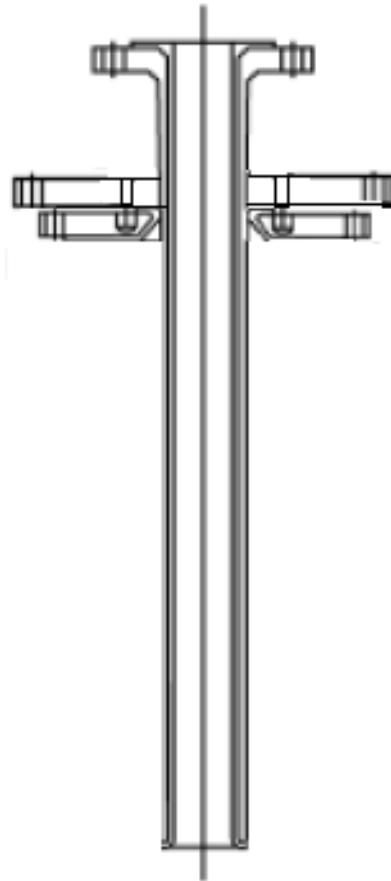

- Carbon steel
- Stainless steel

Lining Material

- PTFE and PFA Virgin

Certificates:

- Test certificate
- Material certificate
